BEFORE THE IDAHO PUBLIC UTILITIES COMMISSION

IN THE MATTER OF DETERMINING)	
PRICES FOR UNBUNDLED NETWORK)	CASE NO. QWE-T-01-11
ELEMENTS (UNE) IN QWEST)	
CORPORATION'S STATEMENT OF)	
GENERALLY AVAILABLE TERMS (SGAT).)	ORDER NO. 29408
)	

This case was opened in June 2001 to establish prices for Qwest's unbundled network elements (UNEs). The federal Telecommunications Act of 1996 requires incumbent local exchange carriers to provide "nondiscriminatory access to [their] network elements on an unbundled basis at any technically feasible point on rates, terms, and conditions that are just, reasonable, and nondiscriminatory," and state commissions are authorized to establish UNE prices that comply with the Act. 47 U.S.C. § 252(c)(3). A Bell Operating Company, such as Qwest Corporation, may include its UNE prices in a Statement of Generally Available Terms (SGAT), setting forth the terms and conditions by which it will comply with the requirements of Section 252. 47 U.S.C. § 252(f). UNE prices are to be based on a total element long-run incremental cost (TELRIC) methodology. In response to a Motion filed by Qwest, the Commission issued Order No. 28748 on June 12, 2001, establishing this proceeding, which included informal workshops to facilitate discussions and possible agreement on prices for specific Qwest UNEs. The first workshop convened on June 23, 2001.

On November 12, 2003, Qwest filed a Motion for Approval of Negotiated Rates, asking the Commission to approve numerous UNE prices identified in Attachment A to Qwest's Motion. Qwest states in its Motion that a number of intervenors participated in the first workshop, but did not actively participate beyond the initial phases. According to Qwest's Motion, Staff and Qwest "continued an extensive dialogue culminating in the negotiated rates that are represented in Attachment A to this Motion." Qwest Motion p. 3. The attachment is included as Attachment A to this Order.

Qwest asked that the Commission process its request for approval of the identified UNE prices by Modified Procedure. The Commission on December 4, 2003, issued a Notice of Request for Approval of Negotiated Rates and Notice of Modified Procedure, establishing a comment period regarding Qwest's Motion for Approval of the Negotiated UNE Rates. During

the comment period, which ended on December 26, 2003, written comments were filed only by the Commission Staff.

In its Motion, Owest stated that "as the workshop process continued, it became clear that only a portion of the UNEs that are reflected in Qwest's SGAT were the subject of significant controversy between Owest and the Staff." Owest Motion p. 3. Owest identified the controversial UNEs as those most often purchased by competing carriers "and those that made up the product known as unbundled network element—platform, or 'UNE-P." Qwest Motion pp. 3-4. For many of the other UNE prices, according to Qwest's Motion, "Qwest and Staff found that it was feasible to reach a negotiated price founded on Qwest's cost studies, but modified by using variant input in the models or, in some cases, reduced to bring them closer to results ordered in other Qwest jurisdictions." Qwest Motion p. 4. In its written comments, Staff concurred with Qwest's representation that the UNE prices contained in Attachment A are not controversial. Staff stated these UNEs "do not generate controversy because they are typically products that are either not frequently ordered, or products with rates that are consistent with the rates charged by Qwest and other Bell Operating Companies in other states." Staff also stated that the rates in Attachment A "were based on a total element long-run incremental cost (TELRIC) methodology, using inputs to the models that Staff considers to be within an acceptable range of reasonableness."

Based on the record presented, the Commission has determined that it is appropriate to approve the UNE prices contained in Attachment A. It is uncontroverted that the UNE prices identified in Attachment A are derived from a TELRIC methodology, and that they are similar if not identical to UNE prices charged by Qwest in its other operating states. The Commission finds the UNE prices in Attachment A to be just, reasonable and nondiscriminatory, and therefore approves them for inclusion in Qwest's SGAT.

ORDER

IT IS HEREBY ORDERED that the unbundled network element prices identified in Attachment A to this Order are approved.

DONE by Order of the Idaho Public Utilities Commission at Boise, Idaho this $2^{\text{ Ad}}$ day of January 2004.

PAUL KJELLANDER, PRESIDENT

MARSHA H. SMITH, COMMISSIONER

DENNIS S. HANSEN, COMMISSIONER

ATTEST:

Commission Secretary

NOTES:

- Rates found in FCC Tariff #1.
- The preliminary engineering and planning costs are included in the caged and cageless space construction charges. These engineering and planning charges are also included in the caged and cageless quote preparation fees. Upon completion of the collocation construction, whichever quote preparation fee (QPF) has been applied will serve as a credit against the final space construction charge for the collocation job.
- ICB Individual Case Basis pricing.
- All technically feasible Vertical Switch Features are available with compatible unbundled switch ports.
- No monthly recurring charge applies for Basic Vertical Switch Features because the cost of those features are included in the cost of the switch port. Only Basic Vertical Switch Features with nonrecurring charges are listed in the SGAT Exhibit A. Nonrecurring charges are applicable whenever a feature is added - whether on
- new installation, conversion, or change order activity. Vertical Switch Features <u>not</u> listed have no incremental nonrecurring charge associated with them.

 The Premium Port monthly recurring charge applies in addition to the Analog or Digital Line Side Port recurring charges when Premium Features are ordered with
- The State of Idaho has retained oversight of these rates. These rates are not under the jurisdiction of the FCC.
